IBM – FE Portfolio Website (MVP Plan)

1. **Project Setup**

- Tech stack:
  - **HTML, CSS, JS** (basic) OR **React** (modern approach).
  - CSS Framework: **Tailwind / Bootstrap / IBM Carbon Design System** (since IBM has its own design system).
- Version control: Initialize GitHub repo for tracking.
- File structure:
- /portfolio
- ├— index.html (or App.jsx if React)
- ├— /assets (images, icons)
- ├— /styles (global.css / Tailwind config)
- ├— /components (navbar, footer, cards, etc.)
- ├— /pages (home, about, projects, contact)

2. **Core Features Implementation**

- **Homepage**
  - Clean introduction with your **name, role (Frontend Developer), and tagline**.
  - A hero section (background + CTA button).
- **About Me Section**
  - Short description of your skills, education, IBM FE background. Download CV
  - button.
- **Skills Section**
  - Frontend tech stack (HTML, CSS, JS, React, Angular, GitHub, etc.). Use progress
  - bars / logos for visuals.
- **Projects Section**
  - Showcase 3–5 projects (like “Product Catalog with Filters”).
  - Each project card: Image, title, tech used, GitHub link, Live Demo link.
- **Contact Section**
  - Contact form (Name, Email, Message).
  - Links to LinkedIn, GitHub, Email.
- **Footer**
  - © 2025 Your Name | Built with ❤

3. **Data Storage (Optional for MVP)**

- Hardcode project data in JSON (can be mapped dynamically in React). Future:
- Integrate CMS (like Strapi / Sanity) to manage projects.

4. **Testing Core Features**

- Responsive design (mobile-first).
- Test all links (GitHub, LinkedIn, projects).
- Validate form (name/email required).

5. **Version Control (GitHub)**

- Use feature branches: navbar-feature, projects-section, etc.
- Commit often with clear messages.
- Deploy free on **GitHub Pages** / **Netlify** / **Verce.**
